DPDPNiti

Govern. Control. Prove.

Operationalising India’s Digital Personal Data Protection Act.

THE OPERATIVE OBLIGATIONS COMMENCE

13 May 2027

Date computed as eighteen months after the 13 November 2025 notification; commencement dates are set by notification and can be changed by notification.

THE CLOCK

The Act arrives in three phases

The Act commences in phases set by G.S.R. 843(E): some provisions on publication, more one year on, and the operative obligations — notice, consent, the Data Fiduciary duties, Data Principal rights — eighteen months from publication: 13 May 2027, computed as eighteen months after the 13 November 2025 notification; commencement dates are set by notification and can be changed by notification.

WHAT DPDPNITI IS

Four modules, in the order the work happens

Assess

What applies, readiness assessments and reports

→

Operate

Controls, evidence, review queue, risk register, remediation, dashboard

→

Registers

Data inventory, processing activities, vendors and processors, notices and policies

→

Respond

Rights requests and incidents

PLANNED

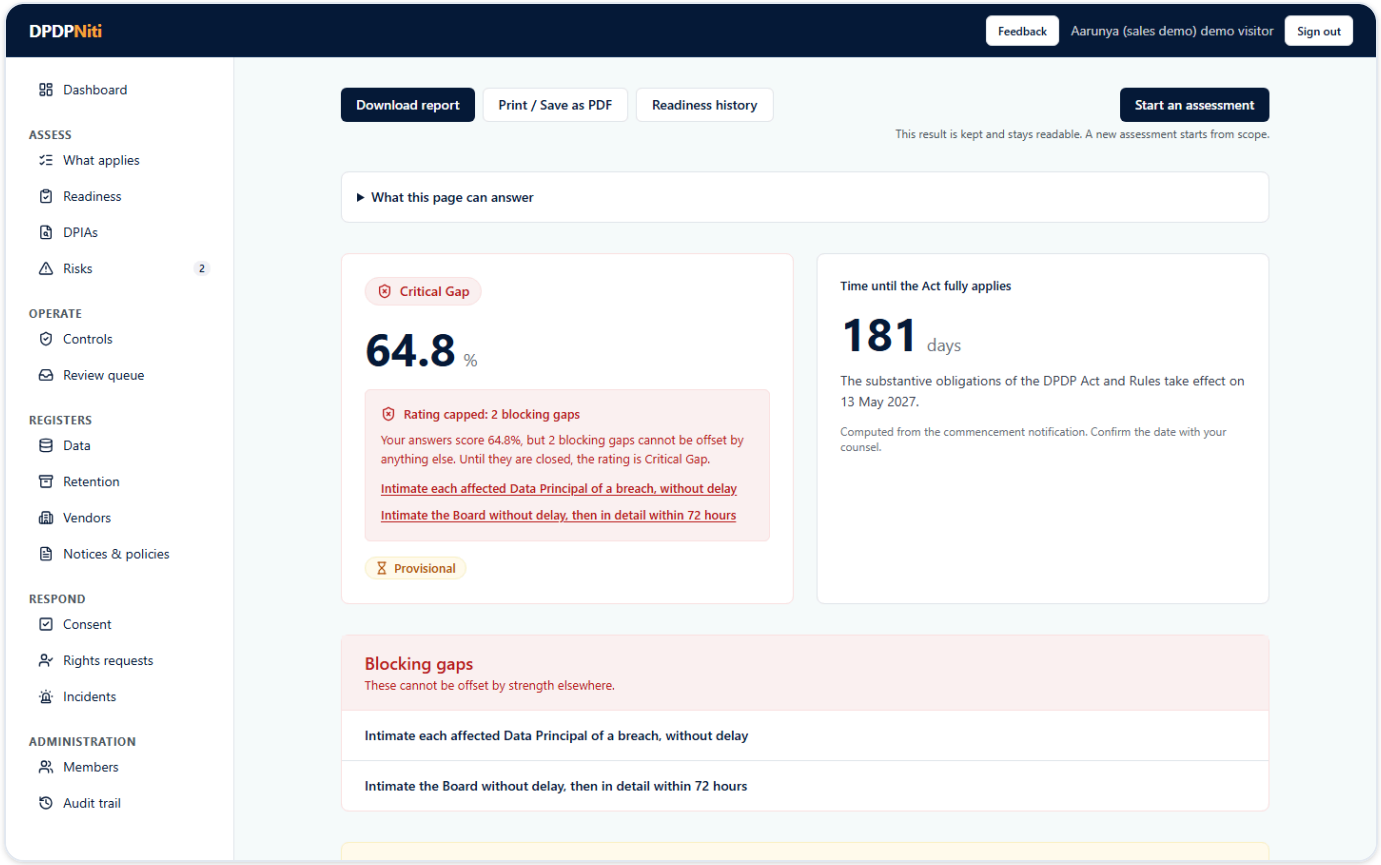

Advanced consent · Public rights request portal · Retention schedules and erasure timers · Breach deadline clocks · Board and CERT-In breach reports

ASSESS

The readiness result

What applies, readiness assessments and reports

> An operational readiness indicator, not a legal compliance determination.

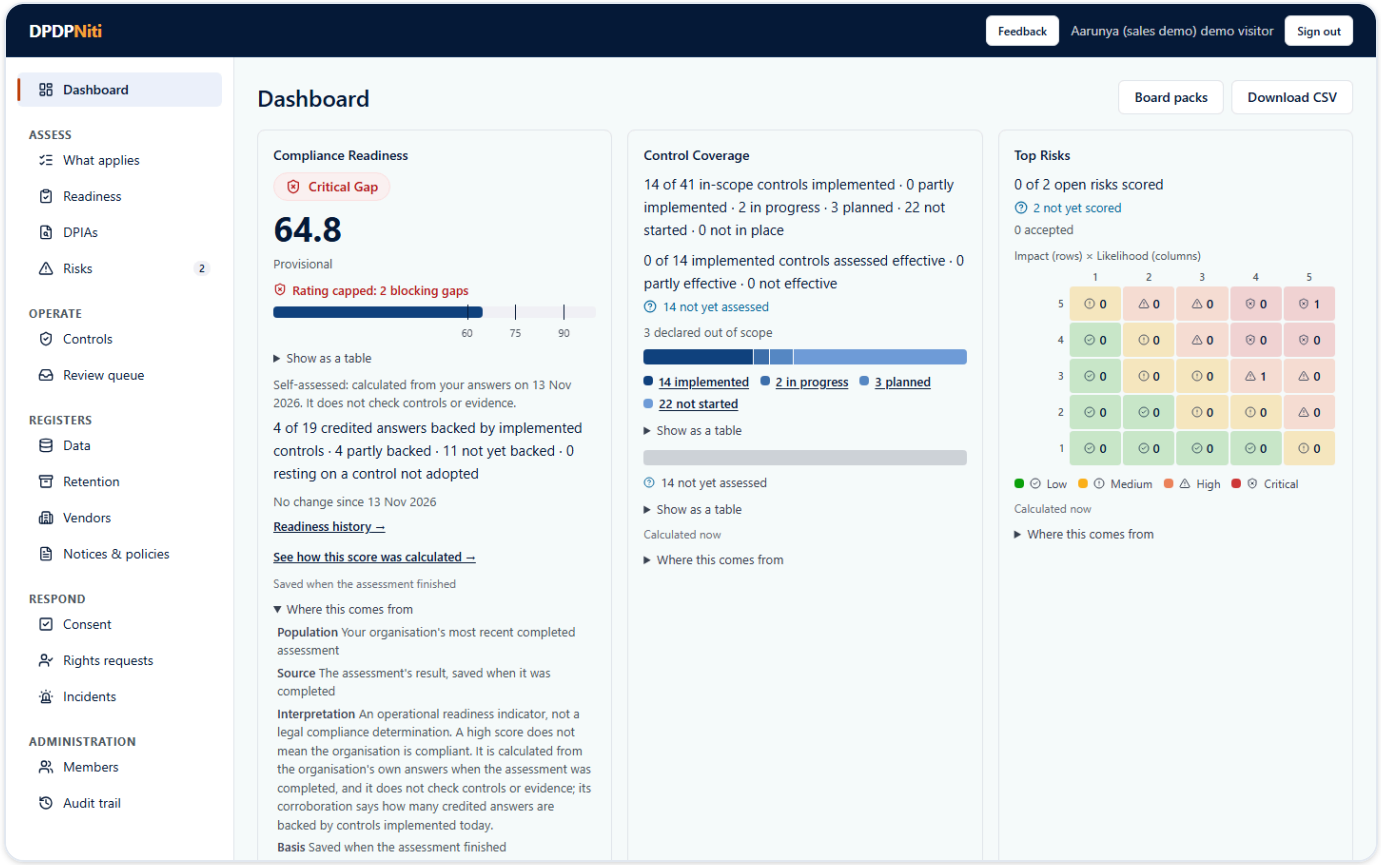

The readiness result. Stored and versioned against the scoring model that produced it, decomposed by section, and showing where a blocking gap caps the rating regardless of the arithmetic.

`/readiness · captured 13 November 2026`

OPERATE

The dashboard

Controls, evidence, review queue, risk register, remediation, dashboard

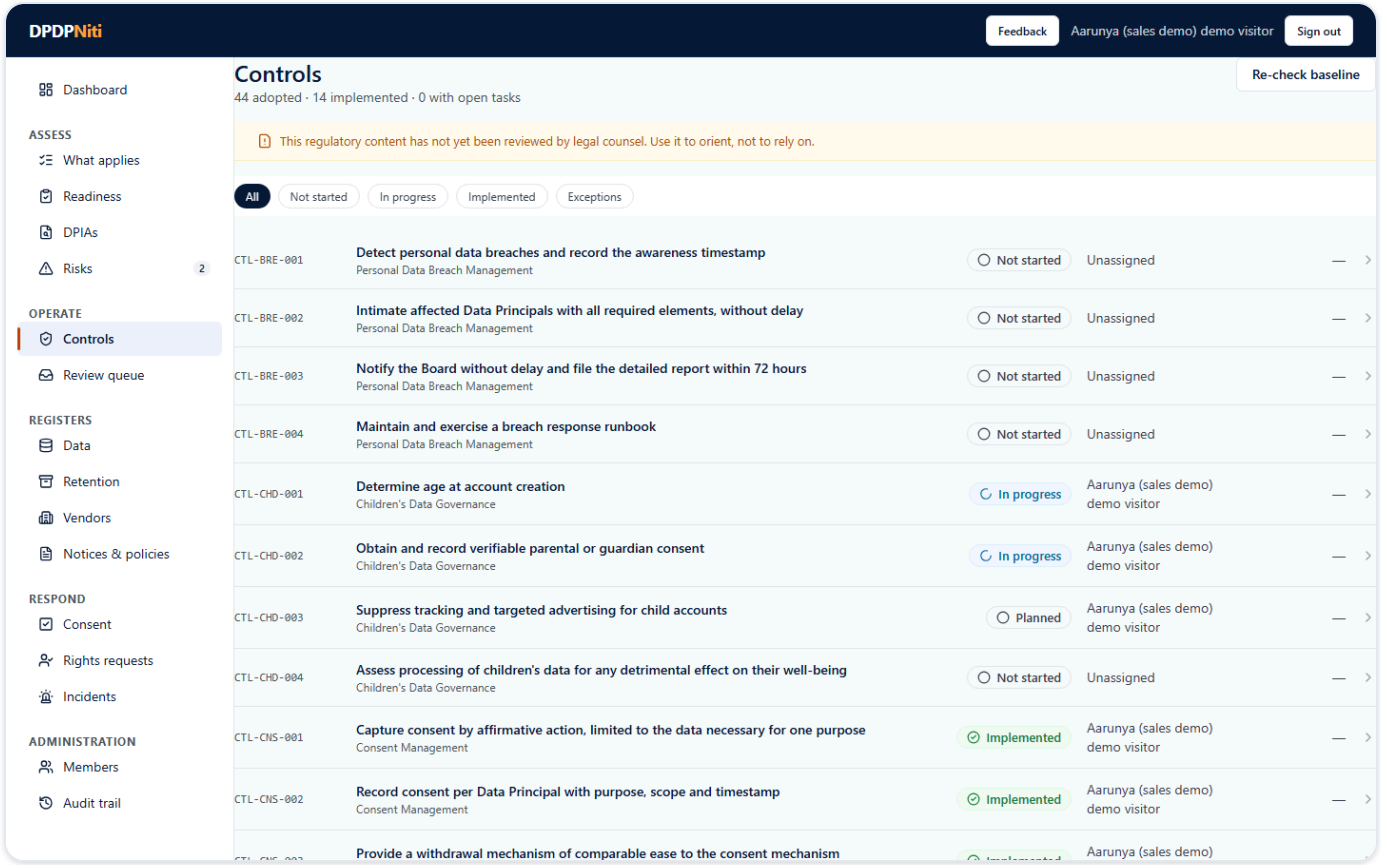

The dashboard. A tile for each area of the programme, each carrying the basis it was calculated on, every chart showing its number with a table view behind it — and every count is a door: it opens the register filtered to exactly what it counts. Each tile appears with the module it reports on.

/ · captured 13 November 2026

OPERATE

Controls, owners and status

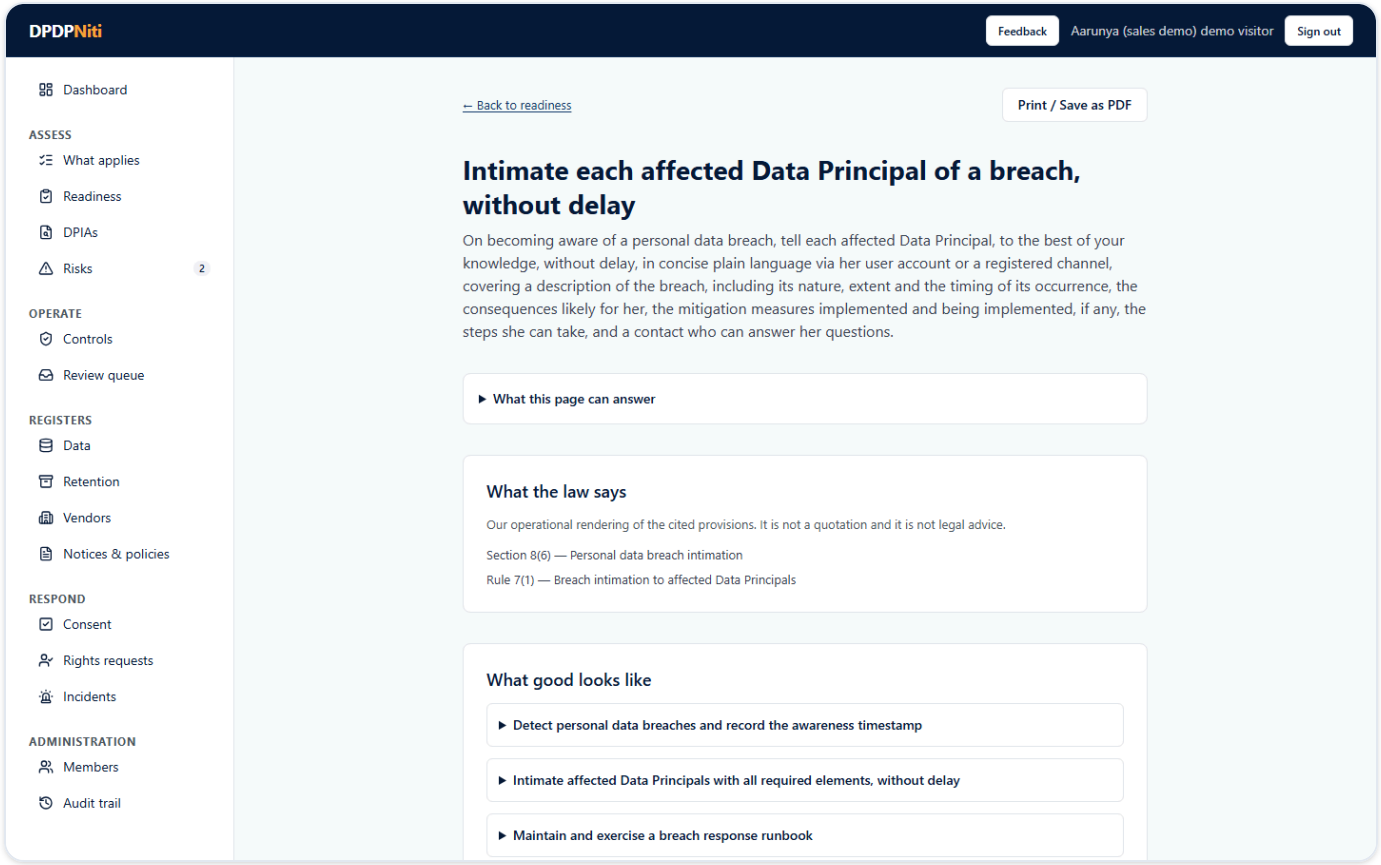

Controls, owners and status. Every obligation that applies has a control, and the register shows which controls still need an owner.

`/controls · captured 13 November 2026`

ASSESS

One gap, in full

One gap, in full. A blocking gap caps the rating however well everything else scores — and the screen shows the provision, why it reaches you, and what closing it would take, while labelling its own rendering of the law as a rendering rather than advice.

`/assessments/…/gaps/Q-DPDP-022 · captured 13 November 2026`

REGISTERS

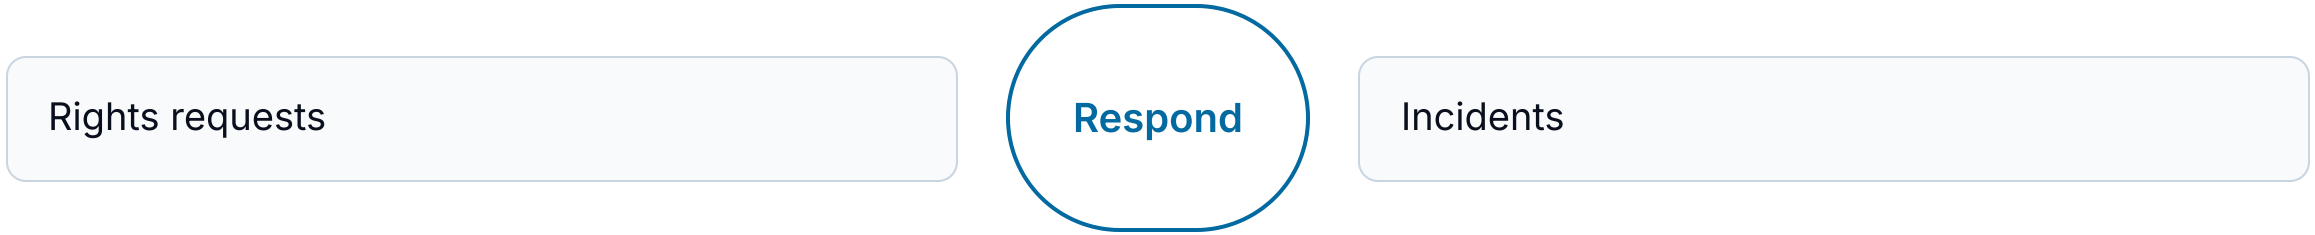

Data inventory, processing activities, vendors and processors, notices and policies

Illustration, not a screen.

RESPOND

Rights requests and incidents

Illustration, not a screen.

Public rights request portal PLANNED Breach deadline clocks PLANNED Breach notices to affected people PLANNED
Board and CERT-In breach reports PLANNED

WHO THIS SERVES

Small practices and local businesses

The Act is written for anyone who processes digital personal data. Whether and how it applies to you is what our questionnaire answers.

WHO PROCESSES PERSONAL DATA LIKE THIS

- CA, CS and legal practices: client KYC, PAN and financials
- Clinics and diagnostic centres
- Salons and spas
- B&Bs and homestays: guest identity documents
- Kirana and retail stores with loyalty or UPI-linked customer records
- Coaching centres

Starter

For startups and small firms reaching a defensible baseline.

FROM DPDPNITI

Assess: What applies, readiness assessments and reports

Expert gap assessment and roadmap

Notice and policy pack

WHO THIS SERVES

Growing businesses

The Act is written for anyone who processes digital personal data. Whether and how it applies to you is what our questionnaire answers.

WHO PROCESSES PERSONAL DATA LIKE THIS

- D2C brands and retail chains
- Food brands and restaurant chains
- Clothing and e-commerce sellers
- NBFCs, fintech and microfinance
- Edtech
- HR and payroll service providers
- Travel and hospitality groups

Professional

For SMEs and the mid-market running the whole programme.

FROM DPDPNITI

Registers: Data inventory, processing activities, vendors and processors, notices and policies

Respond: Rights requests and incidents

DPO-as-a-service / privacy office support

Data mapping and processing-activity build

WHO THIS SERVES

Enterprise and regulated

The Act is written for anyone who processes digital personal data. Whether and how it applies to you is what our questionnaire answers.

WHO PROCESSES PERSONAL DATA LIKE THIS

- Banks and insurers
- Telecoms
- Hospital chains
- Large e-commerce marketplaces and gaming platforms
- Conglomerates and groups

Rights PLANNED

- Public rights request portal
- Requester identity verification
- Grievance redressal workflow

Breach PLANNED

- Breach deadline clocks
- Breach notices to affected people
- Board and CERT-In breach reports

Data PLANNED

- Retention schedules and erasure timers
- Data discovery

SEE IT YOURSELF

demo.dpdpniti.com

Open the live demo yourself: a few questions, and you are inside a working synthetic organisation.

1 · Answer a few questions

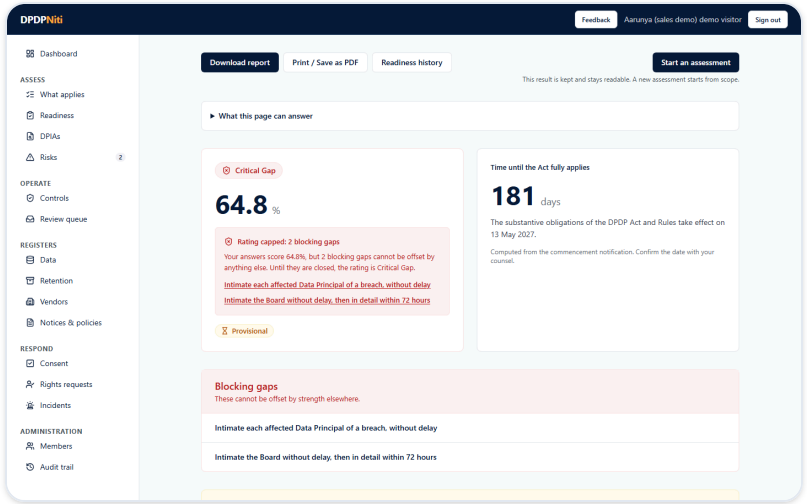

2 · Your demo is open in a new tab.

3 · The demo holds synthetic data only.

THEN, A CONVERSATION

Or book a tailored walkthrough with us.

Ask, and you get a written quotation with every line on it.

The product, as it looked on the day these screens were captured. Shown with every module switched on, including Retention and Consent, which are not yet on sale; your menu shows the modules your plan includes.
